

## Overview

This release introduces a series of new features, focusing primarily on *Transfer* and *Restock* workflows. These improvements aim to streamline processes, enhance user experience, and provide better visibility and control over inventory management.

## Enhancements

- Update Error Messages for Dispensed Items in Restock/Audit/Transfer: Improved clarity, usability, and troubleshooting by providing more specific and actionable error messages.
- **Transfers:**
  - Select Location - List Sites from Same Corporate Entity: Enhances the *Transfer* functionality by prompting users to select a **Practice** and **Clinic** within Receiving Location.
- **Restock:**
  - History: Updated landing page for Restock History, providing a quick overview of past restock events with optional date range selection.
  - Ability to View Detail: Access detailed historical data for review including serial information for each item status: Restocked, Damaged, Not Received.
  - Orders & Manual Restock - Ability to Print Labels for All or Selected Items: Allows users the flexibility to print labels for all or selected items within a Purchase Order or Manual Restock.
  - Allow Adjusted Items to Be Restocked: Restock functionality has been updated to allow *Adjusted* items to be added back into inventory.
- **Orders:**
  - Ability to View Product Info: Updated landing page allows users to view a Product Snapshot when selecting the Order Number, providing context without the need of accessing full Order Details.
- **Audit:**
  - *New Adjust Selection Includes Expired - Replacement Required*: Intended to streamline the management of expired items and ensure timely replacements, improving inventory accuracy and reducing waste.
